

Sahab Noor

MERN & Backend Developer

sahabnoor193@gmail.com | +923290090401 | linkedIn | Github

Summary

Full-stack web developer specializing in the MERN stack with a strong foundation in backend systems, microservices, and RESTful APIs. Passionate about innovation, clean code, and delivering high-impact digital experiences and eager to tackle new technical challenges in dynamic team environments.

Education

Kinnaird College For Women Lahore, Pakistan
Bachelor's in Computer Science 2021 – 2025
Main coursework: OOP, DSA, DB, DAA, MAD, WEB, ML, SQA

Projects

BidMart | *MERN, Tailwind CSS, Vite, Socket.io, Stripe*

- Developed a real-time online bidding platform enabling users to participate in product auctions seamlessly.
- Built using **MERN stack** with **Socket.IO** for live bidding updates and notifications.
- Integrated **secure authentication with JWT** and implemented **Stripe payment gateway** to process transactions safely.
- Developed a **real-time chat system** using Socket.IO to allow bidders and sellers to communicate.
- Designed an **admin dashboard** for managing products, users, and auctions with CRUD operations.

Hope for Paws | *MERN, Tailwind CSS, Vite - [Visit Here](#)*

- A web platform using **MERN stack + Vite + Tailwind CSS** to connect NGOs, clinics, and veterinary professionals for animal welfare initiatives.
- Integrated a **vet reply/comment system** allowing registered veterinarians to respond directly to posts, provide advice, or offer services.
- Facilitated a network of 30+ active volunteers and onboarded 6+ certified veterinarians to offer free online consultancy services through the platform.

IEEE-WIE Lahore Website | *React.js, Vite, Tailwind CSS - [Visit Here](#)*

- Developed an official **React.js + Vite + Tailwind CSS** website for the IEEE-WIE International Summit in Lahore.
- Showcased event details, keynote speaker profiles, schedules, and **online registration functionality** with responsive design.
